-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. The 112 rejection in section 1 of the detailed portion of the office action mailed 13 December 2005 is withdrawn in view of applicant's amendments to claim 1 in the paper filed 13 March 2006.

2. The 103 rejection given in section 3 of the detailed portion of the office action mailed 13 December 2005 is withdrawn in view of applicant's amendments and arguments in the paper filed 13 March 2006.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-6, 8-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grafton (U.S. 5,813,932) in view of Okawa et al. (JP-A 06-264369, Thomson translation).

Art Unit: 1772

Grafton teaches a ball with an outer skin made of high quality artificial suede or nubuck leather (col. 3, lines 10-15). Okawa et al. teach a process of forming an embossed synthetic nubuck or suede leather surface with micropores in the convex portions of the embossed surface (constitution, Thomson translation). The diameter of holes in the convex portions is 10 to 100 micrometers (section 0014 of the translation). The holes are substantially smaller or nonexistent in the concave portions of the surface (0014). The instant invention claims a synthetic surface with micropores on the surface of convex embossments and substantially no micropores in the concave sections of the surface. It would have been obvious to one of ordinary skill of the art to have used the artificial leather of Okawa et al. as the high quality leather of Grafton in order to provide a specific high quality synthetic leather with a suede like surface because of the teachings of Okawa et al.

5. Applicant's arguments with respect to claims 1-6, and 8-19 have been considered but are moot in view of the new ground(s) of rejection.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William
